

WATERPAPER

SHANGHAI INU

LEADING IN

Cryptocurrencies derive their name from the use of cryptographic techniques that enable secure buying, selling, or trading without the need for a third-party intermediary, such as a government or financial institution, to validate a transaction. Unlike fiat currencies like the Dollar, Yuan or Euro, cryptocurrencies exist on the Blockchain - a permanent public ledger of stored information.

A cryptocurrency is a form of digital currency created using encryption algorithms, serving both as a currency and a virtual accounting system. Using encryption technologies, cryptocurrencies can operate without the need for a central authority to verify transactions. To use cryptocurrencies, one requires a cryptocurrency wallet.

The term "Crypto" originated to eliminate the requirement for a third party and only necessitates internet access to complete a transaction. While you can withdraw cash, cryptocurrency exists only digitally and cannot be physically withdrawn.

SHANGHAI INU

Ethereum's Shanghai upgrade is one of the biggest and most anticipated blockchain developments in crypto history. The futuristic cyborg hybrid dog \$SHANG will benefit immensely from this!

Become part of a unique meme token project designed to impress with its awesome utilities like Liquid ETH staking, AI implementation and many other things. Artificial intelligence will play a tremendous role in the world in the future, and Shanghai Inu will provide first-class services in this field in time.

As a 100% community-based project, it is our vision that \$SHANG will get full attention in the crypto space and will fall into the hands of many investors with its eye-catching name and design!

TOKENOMICS

- NO OWNERSHIP!
- 0% BUY FEES, 0% SELL FEES!
- LIQUIDITY LOCKE FOREVER!
- ENTIRE SUPPLY IN CIRCULATION!
- 50% IN LIQUIDITY, 25% BURNED
AND 25% SENT TO VITALIK BUTERIN!

COMPLETELY SAFE, EXTREMELY BULLISH!

ROADMAP

PHASE 1

- Development, Creation
- Staking Pools
- Fair Launch
- First CEX Listing
- Coinmarketcap Listing
- Coingecko Listing
- Marketing Campaigns

- Airdrops
- Social Media Advertising
- Promotions
- Own NFT Collection
- P2E Game
- More CEX Listings
- Special And Targeted Marketing

PHASE 2

PHASE 3

- Mobile Applications
- DAPPs
- SHANG DAO
- Artificial Intelligence Services
- Top Tier 1 CEX Listings
- Various Programming Products
- Many More Things

LIQUID STAKING

Staking can be a great way to earn additional rewards using your cryptocurrency holdings or coins. It's similar to generating interest on cash savings or earning dividends on stock holdings.

We already launched our first liquid staking pools with an attractive APY of 10% and 5%. These pools are unlocked and available for all holders to use. When you stake your \$SHANG Tokens in this pool, you'll automatically earn \$WETH Tokens with 10% APY over time. We also have a second pool where you can stake your \$WETH to earn 5% APY of \$WETH.

With our liquid staking solution, you won't have to worry about being locked in the pool or incurring any additional costs or penalties. You'll be free to unstake your chosen amount of Tokens at any time.

The staking pools will be available for a 30-day period. Afterward, we'll launch new staking pools, topped up with another round of tokens, allowing all holders to earn amazing rewards!

NFTS

NFT stands for 'non-fungible token'. Non-fungible refers to something that is unique and cannot be replaced. In contrast, physical money and cryptocurrencies are fungible and can be exchanged for one another. Each NFT has a digital signature that makes it unique. NFTs are digital assets that can take many forms, including photos, videos, audio files, or other digital formats. Examples of NFTs include artwork, comic books, sports collectibles, trading cards, games, and more.

As part of our marketing and utility strategy, we plan to integrate SHANGHAI INU NFTs into our platform, which will be uploaded and distributed on the OpenSea NFT platform. These NFTs will form a unique two-way utility network that is fully functional, providing holders with a variety of benefits.

We will create several high-quality NFT collections based not only on supply and demand but also on each collection's unique attributes.

As we progress through each stage of launch and project development, we will continue to create developments with a real use case, which will be reflected in our dazzling marketing campaign.

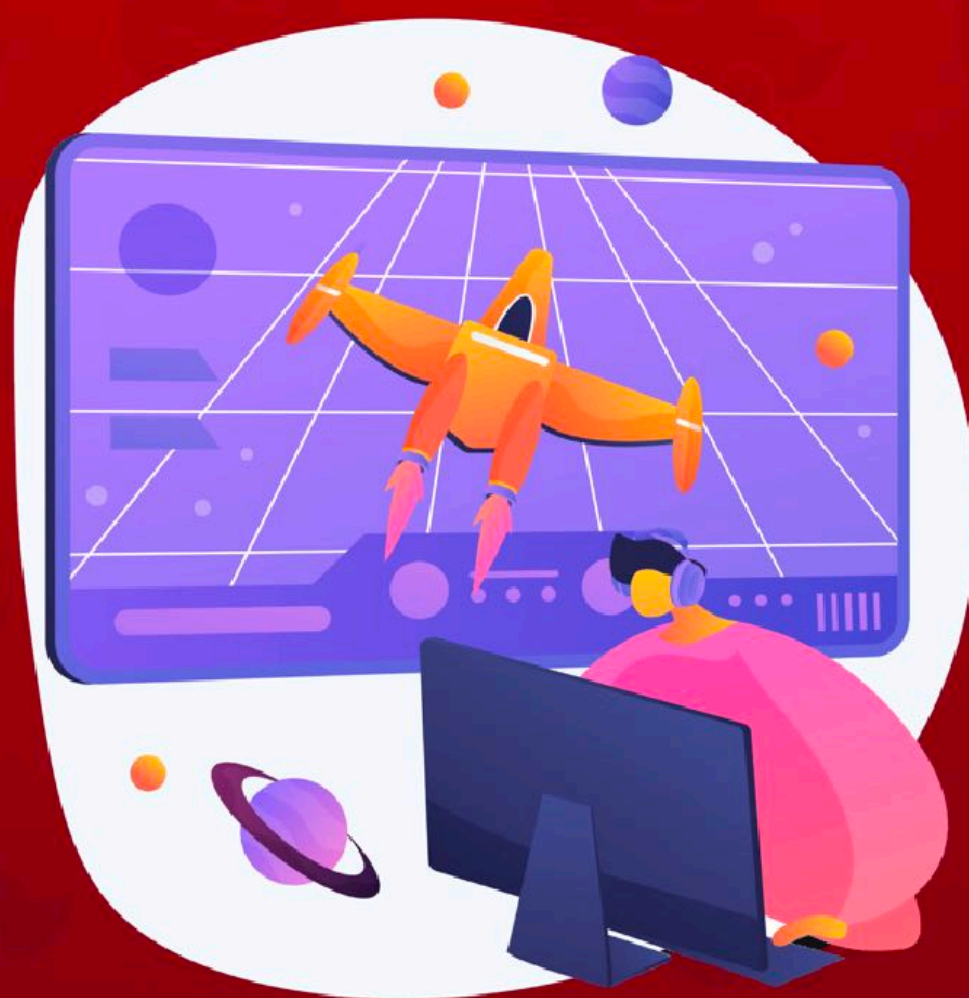

P2E GAME

P2E, or play-to-earn, has emerged as a rapidly growing trend in the NFT and crypto world. This concept allows players to earn real-world assets by participating in blockchain-based games that use non-fungible tokens (NFTs) to represent unique in-game items. These NFTs can be traded and sold on various marketplaces, creating a new economy for gamers.

Our team of technical experts has been working diligently on a fully immersive P2E game for SHANGHAI INU. Our goal is to create a game that not only offers an exciting and engaging experience but also provides a real use case for the project. By fostering a community of like-minded individuals who share common interests and can benefit from mutual activities, we hope to promote the growth and success of SHANGHAI INU.

Our P2E game is not your average run-of-the-mill game with low-quality graphics. Instead, it will offer a high-quality, advanced, and immersive experience for players, complete with multi-functional in-game collectibles, in-depth mechanics, and gameplay suitable for both hardcore and casual players. We aim to embody the principles of equal opportunity, luck, and skill in our digital masterpiece.

ARTIFICIAL INTELLIGENCE

Artificial intelligence (AI) is becoming an increasingly important factor in the world of cryptocurrency. AI technology is being used to analyze vast amounts of data in real-time, enabling investors and traders to make better decisions and identify profitable opportunities. AI is also being used to automate various processes, such as trading and risk management, and to improve the security of blockchain-based systems.

One of the key benefits of AI in the crypto industry is its ability to process large amounts of data in a fraction of the time it would take a human to do so.

This is particularly useful in the world of trading, where decisions must be made quickly and based on constantly changing market conditions. By using AI algorithms to analyze market data, traders can gain a better understanding of market trends and make more informed decisions about when to buy and sell.

Another area where AI is being used in the crypto industry is in the field of security. Blockchain-based systems are inherently secure due to their decentralized and immutable nature, but there are still vulnerabilities that can be exploited by hackers. AI technology can be used to identify potential security threats and to proactively defend against them. For example, machine learning algorithms can be trained to detect patterns of suspicious activity on the blockchain, such as large-scale transactions or unusual network behavior.

Overall, the use of AI in the crypto industry is still in its early stages, but its potential is enormous. As blockchain-based systems continue to grow in popularity and complexity, the need for sophisticated AI-based solutions will only increase.

As part of its core utility development plan and execution, SHANGHAI INU aims to incorporate AI technology. This integration will take place following the completion of critical stages in the Roadmap. SHANGHAI INU will function as a dedicated platform for AI and ML researchers and developers to design and test new models, applications, and algorithms in a decentralized and open environment. This will usher in a new era of innovation in the Memecoin space.

TO CONCLUDE

The \$SHANG team is a skilled and diverse group of professionals from various parts of the world, dedicated to propelling SHANGHAI INU to new heights. With a wealth of collective knowledge and experience in the cryptocurrency industry, we aim to provide an unparalleled experience of Staking, AI-Technology, NFTs and expand upon it in the months and years ahead. Our ultimate goal is to foster a robust and loyal community of SHANGHAI INU holders.

Transparency and accessibility are key to building trust with our community. As such, we are committed to clear and open communication, facilitated by our team members' fluency in multiple languages. With our combined expertise and unwavering passion for the industry, we are confident in our ability to establish SHANGHAI INU as a force to be reckoned with in the world of cryptocurrency.
